

Effective Date 01/01/24 -12/31/24

2024 HVAC Freight Program

Please see the 2024 HVAC Freight Program outlined below.

Standard Freight Charges - All products shipped within the continental U.S.

For smaller orders that include units, Friedrich will charge Distributors for freight charges at rates outlined below based on the number of units/sleeves on an order (subject to change):

Units	Per Unit/Sleeves
1	\$ 135 ea.
2-9	\$ 50 ea.
10+ Units or \$20K	PPD
DSS 10 Systems	PPD
Limited Access	\$20
Lift Gate	\$75
Residential Delivery	\$75
Inside Delivery	\$150

* A unit is defined as an individually packaged model, apart from DSS, which will be counted at a system level.

Wall sleeves (PDXWSA, PDXWSEZ, USC, WSE, and VPAWP1-8 or VPAWP1-14) will be counted as 'units' for standard freight.

Accessories other than sleeves can be added to an order/shipment at no additional freight cost.

Orders that fall below these qualifications or have multiple destinations or requested split shipments will be considered separate shipments and assessed freight at a shipment level.

Freight for accessory-only orders (with no units) will be charged on an individual quote basis.
