PRODUCT BULLETIN

Product Management

DATE: 04/20/2024

SUBJECT: Phase In / ZAS R32 PTAC

DOCUMENT NUMBER: 005-024-PTAC

BULLETIN TYPE: New Product Announcement

AUTHOR: Product Management

PRODUCTS AFFECTED: ZoneAire™ Select PTAC, PTHP

Description

As Friedrich prepares for the upcoming federally mandated low GWP refrigerant regulation, we are excited to announce our new **ZoneAire™ Select R32** models of PTAC and PTHP. ZoneAire Select R32 models can easily be identified with a “C” in the last digit (9th position) of the nomenclature.

This conversion includes the entire ZoneAire Select line of package terminal products to low GWP R32 refrigerant while retaining our current aesthetic, controls, chassis design, and dimensions. Friedrich customers can continue to expect Friedrich’s traditional high performance and reliability from our new line of low GWP refrigerant packaged products.

Additionally, based on growing customer demand, Friedrich has also added 3 new SKU’s of ZoneAire Select PTHP containing alternative heater kit sizes. See model lineup (Fig. A).

Cooling W/Elec Heat	UPC	Heat Pump	UPC

Important Phase In / Phase Out Dates

First Order: Now Available

First Ship: July 2024

Phase Out: Select R410a PTAC will deplete May-Aug. FAC plans to auto substitute R410a “B” for R32 “C” models as necessary.

Notice: R410a packaged terminal products built in 2024 remain eligible to be sold for 3 years under current US Federal regulation.

For questions about this bulletin, please contact the Product Management team.
